1.1 Definition

Where people go and buy or sell cars, that platform is called Car Shop (car selling).

1.2 Introduction

- Over website ‘Car Shop’ is providing best facility like other website but we give more benefit.
- Other website exist ago over car shop but they have some disadvantage, so over group think that we try to remove it. And make bast website from over side.
- Other tinks about over web right below.

1.3 Existing System

- URL: https://www.cardekho.com/used-cars+in+ahmedabad
- We are choose this website because this is best car ceiling and buying web.

1.4 Disadvantage of CarDekho

- Lead sharing with dealerships: When user requesting for quote or test drive. User contact detail share with dealers at last you have multiple calls from seller.
- Estimated on-road prices: CarDekho displayed on-road price but, when you purchase car than many types of cost like local taxes, insurance, accessories, and dealer discounts include at last you pay more than money for car.

2.1 Need for New System

- The new car selling system is needed to make the process of buying and selling cars faster and easier.
- The new system stores all information in digitals.
- Customers can view available cars, compare prices, and make inquiries online.
- Overall, the new system saves time, reduces mistakes, improves customer service, and increases business efficiency.

2.2 Objective of New System

- It streamlines inventory management.
- Provides secure payment processing, and enables users to easily.
- Over website billed users trust.
- When user sell car then over website verify car document from Trustworthy Source and also check FIR. All check document provide buyer.

2.3 Problem Definition

- The current car selling process is mostly manual and which takes more time and effort.
- Customer information, and sales records.
- Customers cannot easily check available cars or compare prices without visiting the showroom.
- Therefore, a computerized car selling system is needed to manage car information, customer details, and sales in a simple, fast, and accurate way.

3.1 Core Components

3.2 User Type

- Here 3 type of user work in this web.
- 1. Admin
- 2. Buyer
- 3. Seller

3.2.1 Admin

- Admin generate numbers of users list.
- Admin can changed logo and functions.
- Admin Preparing documents and reports.

3.2.2 Buyer

- Show car and it’s another detail.
- He/She think that car is suitable for them.

3.2.3 Seller

- Upload details of the car like: Photo, Car no., km of run, contact no. and extra detail.
- Seller communicate with buyer to complete process of car transfer.

3.3 Scope of Project

- Over project cover user benefit and user security.
- We include study function so that user learn about car Sell and bay, also about website.
- We are not include extra cost for bay and sell (boundaries of the project).
- Over target is provide best opportunity for customer and make positive bond. That’s way over website target user and environment in field.

4.1 Advantages and Limitation

4.1.1 Advantages

- This site easy to use and make simple process for customer.
- It’s include many different option so that customer take more opportunity.
- Customer easy to understand about all process for sale and buy.
- This site not need special technical knowledge.
- It’s not require expensive software for start.

4.1.2 Benefit

- No Broker need so that Customer save Money.
- Buyer Direct contact to Sailor.
- No extra Paperwork need.
- All benefit include bottom of the document as file.

4.1.3 Disadvantage

- Time and effort – Creating listings, answering inquiries, arranging viewings, and negotiating with buyers can be time-consuming.
- Repair or cleaning costs – You may need to spend money on detailing or minor repairs to make the car more attractive to buyers.

4.2 Team Details and Roles
